

Vinyl CD - *feel the groove*™

Vinyl CD - a CD goes retro

Vinyl-CD is a fully functional CD-Audio which comes in the cool vinyl look.

This newly designed CD is made from coloured polycarbonate which gives it the unique appearance of a miniature record. A label sized smaller than on your traditional 12cm CD enhances the vinyl look! The label size may also be varied, depending on individual requirements. With grooves printed on the remaining part, the Vinyl-CD will truly resemble a record from the past! The disc can be read by any CD player.

Vinyl CD is a regular CD with standard capacity and compatibility - only the unique appearance of the CD makes all the difference!

21st Century Vinyl-Discs:

Increase the memorability of your discs with this unique look, and give your customers a disc with which they can literally ***feel the groove***™

- Standard Red Book CD-Audio
- Minimum ordering quantity: 1000 units
- Turnaround Times: Standard turnaround + 3 days
- Orders > 500,000 units on request
- Label specifications: Spec "F" - Like a DVD, with no "staple-ring"
- Vary the size of your individual label and choose the vinyl appearance which suits you best
- Only available in high quality Offset Litho printing
- Black, Blue, or Red polycarbonate
- Polycarbonate colour applies to the whole CD - even the DATA side is vinyl black! Just like many whitelabel promo 12" vinyl records .
- Vinyl CD's offer the same compatibility as a traditional silver CD.
- Discs have a true groove - not just a flat image of a vinyl record!
